10:56 AM **me**: check it, yo
I've been on Daily Kos rec list since 5:00 am
10:57 AM and just recruited a former gov't info security effort to Project PM
as well as Baghdad correspondent Michael Hastings
and prompted a bunch of kossacks to call up a bunch of congressmen and tell them to knock some shit off
10:58 AM plus I did a radio interview yesterday
in which I called for global perpetual revolution
Mark: you've ben busy
revolution?
10:59 AM **me**: by way of stealing the soft power of nation-states and "storing" it in an ever-expanding network of international erudites
11:00 AM plus I fucked pwned some n00b True/Slant "Russia specialist" regarding Putin last night
again
but moreso this time
Mark: i saw
but honestly
tl;dr
me: Will you serve as chief Japanese relations strategist for Project PM?
11:01 AM **Mark**: umm
me: it won't really require you to do anything
Mark: i don't really have time or much knowledge
me: yet
Mark: but if you have questions i can see how i can help
me: I might occasionally ask you questions about to deal with potential japanese participants
11:02 AM my policy is that I press-gang academics into my network so you are now Japanese Affairs Advisor
Mark: fantastic
11:03 AM i'll print up business cards
me: otherwise I'd have to make Kai that
and frankly, I'm horrified by his ethics
Mark: you've been talking to him about his penny stock dealings?
11:04 AM **me**: seems like the kind of person who would press-gang an academic into an anarchist conspiracy while he's trying to get legitimate work done
not lately, no

but I recall that

41 minutes

11:46 AM **me**: also, you may recall Jeff Goldstein
target of my first major psy-ops improvisational lulz assassination
he went off the deep end again

11:47 AM **Mark**: how so?

11:50 AM **me**: one sec
I'm about to make it worse

11:53 AM http://www.lawyersgunsmoneyblog.com/2010/03/what-do-you-do-in-the-wake-of-a-crushing-political-defeat

11:56 AM **Mark**: who's SEK?

me: some commenter
you need to see Goldstein's comment, linked from that link
